- Second stakeholder-meeting
 - Thoughts and reflections

First meeting, January 2022

We were "The experts":

- Presented facts/problems from the "expert" perspective
- Defined the aim of the project
- Brought the solutions to the table
- Explained how the process would be

We thought, it was a good meeting!

First meeting, January 2022

The need for stakeholder involvement *was* acknowledged, as far as we recognized the need of the stakeholders accept of the proposed solutions.

Project actions, January - June

- Jan-Feb: Individual meetings with landowners and other stakeholders
- March: Initiating data-collection (Baseline)
- May: Meeting with consulting firm

Preparing the second meeting

- Coaching on the job, part 2:
 - Designing the meeting

Be sure to consider <u>all</u> stakeholders - including those, who might not be a stakeholder in your opinion. If someone shows interest in the project, they're probably relevant.

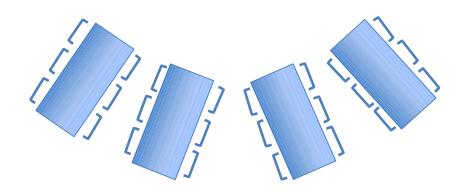

Preparing the second meeting

When: Monday, 12th of September, 18:00-21:00.

Where: Oddehus, a local conference room.

Issues then swiched between tables.

Tips for helping stakeholders to articulate their interests

- > In a first one2one meeting you can elaborate a bit about your own interest. A good example is easy to follow!
- A first one2one meeting with a stakeholder, is an excellent opportunity to verify your summary of the interests they mentioned in the conversation. Invite them to bring them to the table.
- Support the stakeholders with a professional facilitator in Connective Negotiation at each table to help them to articulate their interests.
- As you go into a second round of collecting the interests, make sure you book progress. Stakeholders might lose their appetite to joint these kind of meetings very quickly.
- > Using interviewing techniques and invite stakeholder A to summarize and present the interests of stakeholder B is sometimes playful and effective.
- Make a separate arking flip for all the solutions that inevitably will come up. It is calming when stakeholders can see that their ideas are captured, although they are not subject of todays agenda.

Thoughts and reflections

"I know a local entrepreneur, who works on nature restauration projects in GB."

The stakeholders have knowledge, ressources and potential!

"You're always welcome to use my conference room for your meetings."

"We can help with baseline-data, taking watersamples and bird counting."

You'll get personal informations – confidentiality is a strict necessity

"I took over their land many years ago, because they went bankrupt." "He is in a very poor health."

Thoughts and reflections

The dinner proved valuable. People had time to talk and settle in.

Take your time, when explaining the stakeholder what to do. They've (probably) never been part of a workshop before. Use examples.

We are very good at positions and solutions. Realizing interests is far more difficult.

Finish the meeting on time.

You don't have all the answers – and thats ok.
